SUMMARY

Full Stack Developer Intern skilled in Java, Spring Boot, React, and MySQL with hands-on experience building RESTful APIs, secure authentication, and scalable database-backed web applications. Familiar with microservices basics, CI/CD concepts, Agile/Scrum, and testing fundamentals (JUnit, Postman). Comfortable with Git and Docker; familiar with Kubernetes basics.

SKILLS

Languages: Java, Python (basic)

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, OpenAPI (Swagger), JPA (Hibernate), JWT, Input validation (Jakarta Validation), Microservices (basic)

Databases: MySQL, Database design, Redis (basic)

DevOps/Tools: Docker (basic), Kubernetes (basic), Git, GitHub, Maven, VS Code, CI/CD (basic)

Testing: JUnit (basic), Postman (basic), API testing basics

Exposure: Observability basics (logs and metrics)

EXPERIENCE

AutoObserver — AI/ML Model Building Team Intern (Remote) (Mar 2026 – May 2026)

- Completed a 3-month internship in the AI/ML Model Building team focused on observability use cases.
- Building container workflows using Docker and Podman; practicing Kubernetes basics (pods, deployments, services) in a simulated environment.
- Gaining exposure to event streaming with Redpanda and Linux observability concepts using eBPF (basics).
- Applying observability fundamentals (logs, metrics, traces) during debugging and troubleshooting exercises.

PROJECTS

Digital Wallet System (PhonePe Wallet Clone) — Spring Boot, Spring Security, React, MySQL, Swagger (Jan 2026 – Feb 2026) | GitHub: github.com/VajralaYashwanthReddy/digital-wallet-springboot-react

- Engineered a full-stack digital wallet with 10 features and 7 API routes across 3 modules: users, wallet, and transactions.
- Implemented secure authentication using Spring Security with PIN hashing (BCrypt); integrated React and backend APIs using CORS.
- Designed a 3-layer backend (controller, service, repository) with 3 JPA entities; added request validation, tested APIs using Postman, and published OpenAPI (Swagger) docs.

Full Stack Stock Trading Platform — React, Spring Boot, MySQL, Swagger, JWT (Jan 2026 – Feb 2026) | GitHub: github.com/VajralaYashwanthReddy/fullstack-stock-trading-app

- Developed a stock trading platform with 7 features and 12 REST endpoints covering users, trading, and stocks.
- Implemented buy and sell workflows, portfolio tracking, and transaction history in Spring Boot; documented endpoints using OpenAPI (Swagger) for API testing.
- Designed database models with JPA (3 entities: User, Portfolio, Transaction), persisted data in MySQL, and delivered a responsive UI using React and Tailwind CSS; tested APIs using Postman.

EDUCATION

Malla Reddy University, Hyderabad — Bachelor of Technology (B.Tech), Computer Science and Engineering (Expected 2027)

CGPA: 8.72

CERTIFICATIONS

- AWS Academy Graduate — Cloud Foundations (Training Badge)
- NPTEL — Software Project Management
- EduSkills — Java Full Stack Developer Virtual Internship (Certificate)
- Cambridge B2 (05/2024)
- EduSkills — DevOps & Cloud Automation Virtual Internship (Certificate)

ACHIEVEMENTS & VOLUNTEERING

- Hackathon — Malla Reddy University (07/2025)
- Agentathon — CollegeTech Volunteer (20–21 Dec 2025)
